I love my XM radio. I think it is a great alternative to AM & FM radio stations. I pay money each month to enjoy variety and check traffic in my commuting area. I hope that my freedoms are not compromised by the FCC choosing which satellite radio stations I listen to and which satellite radio stations are provided to me. I honestly believe that overall FM station owners wouldn't be so concerned about this if they had better local coverage and variety.  
Reject the NAB's petition 04-160.

Thank you for your time.
